PROFESIONAL SUMMARY

A UI/UX Designer with 3+ years of experience creating user-centered designs across education, branding, entertainment, gaming, music, finance, and business. Skilled in end-to-end design, user research, and delivering intuitive, functional solutions. With a background in game technology and Apple Developer Academy, I focus on innovative designs that balance aesthetics and user needs.

EXPERIENCE

Apple Games Institute @Infinite Learning 3D Artist & UIUX Designer - Designed 3D characters and environments, including rigging, animation, texturing, and Unity implementation, ensuring seamless integration of assets for programmers and smoother development workflow. - Created clear and structured Game Design Document (GDD) and Art Design Document (ADD) to improve team understanding of concept art and game design.	Batam, Indonesia Jul 2025 - Present
VocaGame UI/UX Designer - Developed a structured design system using Figma's local variables, including elements such as colors, sizes, typography, assets, asset naming, and more. This system supports theme changes (dark mode/light mode/new color). Design adjustments can be made 70% faster, enabling the team to respond more efficiently to stakeholder requirements. - Collaborate with development teams and stakeholders to ensure designs align with product vision, enabling timely completion of design projects. Develop a structured design system that can increase design turnaround speed by more than 50%, resulting in more than 100 screens per project across multiple use cases.	Surabaya, Indonesia Mar 2025 - Jul 2025
Haven Grind Creative Designer Developed the company's branding from scratch by designing the logo and managing social media accounts (Instagram, TikTok). Produced over 30 posts on Instagram, receiving more than 350 likes, and gained 4,000+ views on TikTok content during the management period.	Surabaya, Indonesia Jan 2025 - Mar 2025
Apple Developer Academy @Infinite Learning UIUX Designer at Project Tokko, Chordlify, PinBi, Astrodam, and Loona - Responded to user problems by delivering innovative solutions, such as a custom keyboard for inputting weight or measurements of raw materials educing user input errors by 15%., applying both creative thinking and analytic thinking (Tokko). - Conducted 4 rounds of usability testing (UT) with highly satisfactory results. During High-Fidelity design UT, 100% of tasks were successfully completed by prospective users, with a click accuracy rate of 80%(Tokko). - Conducted usability testing with prospective users, leveraging active listening to gain valuable insights and achieving 100% task completion accuracy (Chordlify).	Batam, Indonesia Oct 2024 - Dec 2024
Game for Education and Cultural Heritage UI/UX Designer at Angkringan Project - Collaborated with a cross-functional team of 10+ programmers, artists, and game designers, following the Game Design Document (GDD) and and achieving a 20% improvement in project delivery time by effectively balancing technical and creative goals.. - Developed a comprehensive Design System that improved consistency across the project, reducing design iteration time by 30% and increasing team efficiency by 25%.	Surabaya, Indonesia Jul 2023 - Feb 2024
Pusat Assesmen Pendidikan Indonesia U/IUX Designer and Illustrator - Created over 6 variations of the main character illustrations from scratch, and developed a structured design system that reduced design iteration time by 40%. - Collaborated with 2 game designers and 2 game programmers to complete the project, producing more than 40 screens and covering all use cases	Surabaya, Indonesia Aug 2023 - Dec 2023
